
Streamlining Tax Compliance with AI-Driven Precision

KSA VAT Auditor: A specialized platform for seamless Value Added Tax management in full compliance with ZATCA regulations

Made with GAMMA

The KSA VAT Auditor Advantage

A specialized financial auditing platform engineered for the Saudi Arabian market. It transforms complex manual VAT processes into seamless digital experiences, enabling businesses and tax professionals to manage, calculate, and audit Value Added Tax with unprecedented accuracy and speed.

Pre-configured for the standard 15% VAT rate and designed to support the specific financial structures of Middle Eastern enterprises.

Made with GAMMA

Three Pillars of Excellence

Regulatory Alignment

Pre-configured for the standard 15% VAT rate in KSA. Fully compliant with ZATCA (Zakat, Tax and Customs Authority) regulations from day one.

Unmatched Efficiency

Reduces audit time by as much as 70% through automated report scanning and AI-powered data extraction. Transform hours of manual work into minutes.

Precision & Accuracy

Eliminates human error in tax calculations and adjustments. Bilingual readiness ensures seamless operation for Middle Eastern enterprises.

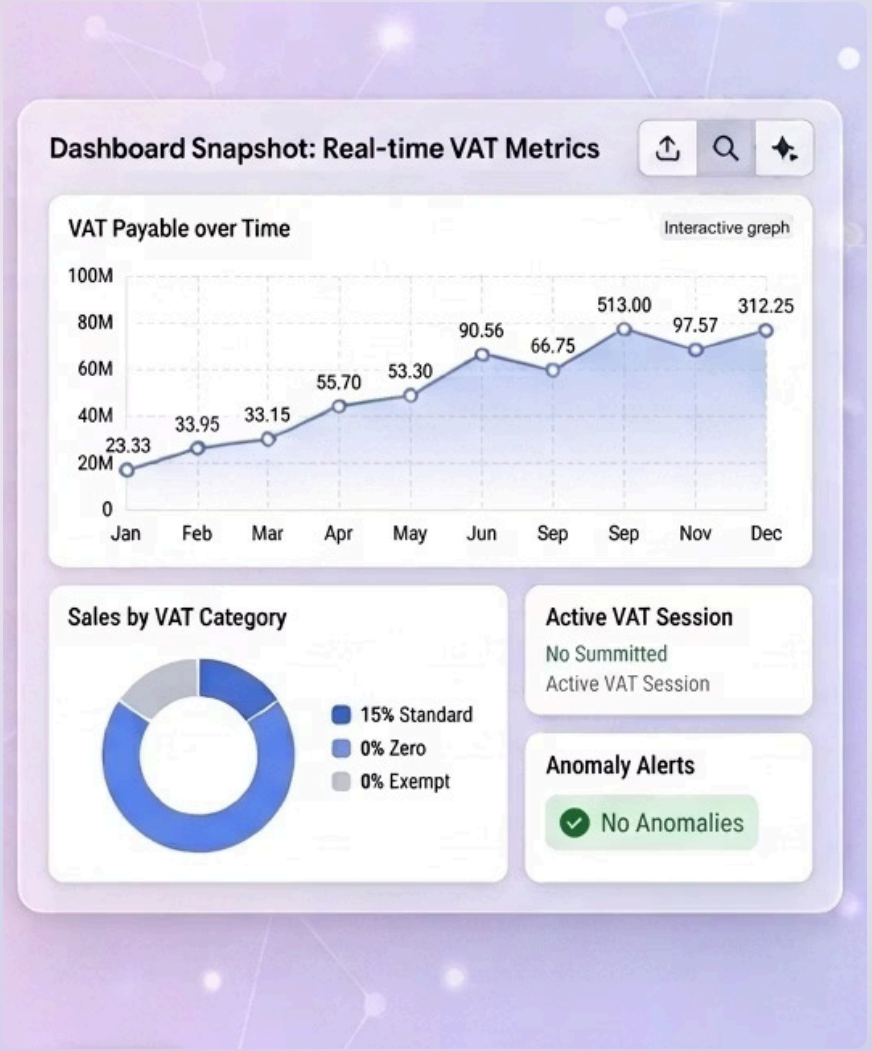
AI-Powered PDF Import: The Game-Changer

Intelligent Data Extraction

The standout feature that sets this auditor apart: its ability to "read" financial reports. Utilizing Google Gemini AI, users simply upload PDF reports, and the system automatically extracts Sales, Purchases, and Tax data, populating audit fields instantly.

- Automated extraction of financial data from PDF reports
- Instant population of audit fields without manual entry
- Reduction of data entry time by up to 70%

Made with GAMMA



Comprehensive Financial Overview

Get an instant snapshot of your tax health. The intuitive dashboard provides real-time tracking of VAT Payable, Total Sales, and Net Purchases, visualized through interactive charts to help identify financial trends and anomalies.

Detailed Tax Categorization

Manage complex tax scenarios with ease through dedicated sections for comprehensive VAT management.

1

Sales Management

Tracking VAT-standard (15%), Zero-rated, and Exempt sales with clear categorization and reporting.

2

Purchase Tracking

Detailed input tax deduction for domestic and imported goods with full audit trail.

3

Adjustments

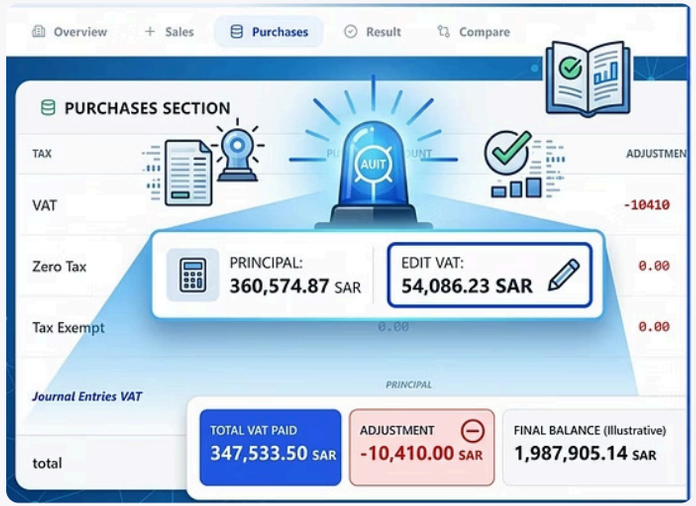
Handling complex reversals, credit notes, and manual corrections with professional precision.

Made with GAMMA

Intelligent Adjustment & Professional Reporting

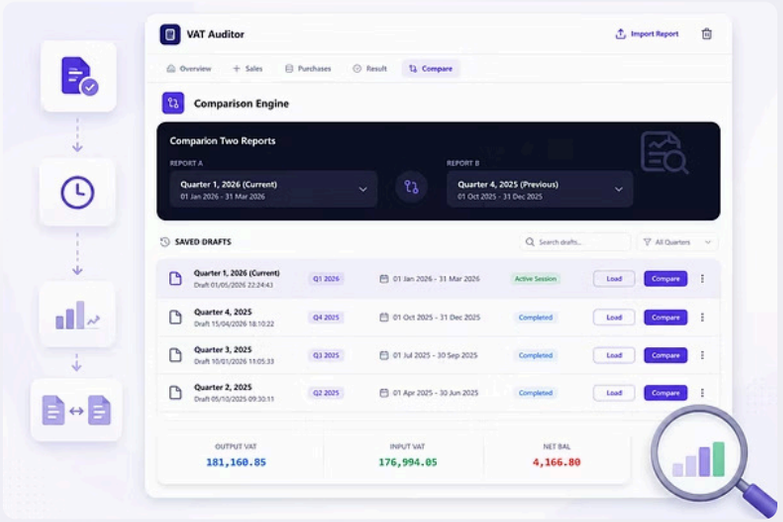
Manual Input & Reconciliation

Professional auditors can manually input VAT credits carried forward, corrections, and journal adjustments. This ensures the final VAT liability is perfectly reconciled with the company's books.



Historical Tracking

Never lose your work. The system allows users to save audits as drafts, view historical records of past filings, and compare current data with previous quarters to ensure consistency.



Professional Reporting & Print: Generate clean, audit-ready summaries with built-in printing support. Export your VAT audit into a professional format suitable for internal records or ZATCA review.
